

Sorts of Functions

Sorts of Functions

There can also be functions taking types as arguments and returning terms (or vice versa). They are of the sort:

type – kind

kind – type

Function Sorts as Dimensions

There are 8 possibilities to construct calculi with functions of sort kind – kind, type, kind or kind – type

is not really useful to construct a calculus which does not
low type functions of sort type!

Towards the,

Function Sorts as Dimensions

kind – kind, type – kind and kind – tye can be seen
