

Assignment 2

Tibor Szabó

Positional Games, Winter 2009-10

Due date: Oct 27th (Tuesday) by 16:15PM

Problem 1 Find an explicit domino tiling pairing strategy for each of the three known Basic Loser 6-cell animals. (That is, give a pairing strategy for each that prevents first player to build the particular animal.)

Problem 2 Show that the game Bridge-It cannot end in a draw.
